

## 18" WOOD/METAL VERTICAL BANDSAW

The JET 18" Bandsaw has been equipped with a heavy-duty gear box allowing it to cut both wood and metal. A lever on the gear box allows for quick indexing between high and low speeds. Additional speeds can be configured under each gear by advancing the drive belt among the three pulley diameters. The pivoting motor and gear box assembly with tension release handle makes advancing the drive belt quick and easy. Additional features include blade tracking adjustment window, precision roller bearing blade guides, and a precision T-square style fence.
