Crestron Isys™ TPS-2000L Compact Video Touchpanel

The Isys™ TPS-2000L Compact Video Touchpanel sets new standards in touchpanel technology. It incorporates features found only in our top-of-the-line Isys panels yet it's so cost-effective, you can put one in every room. A color active-matrix video touchpanel combined with ten easy-to-use pushbuttons makes an incredibly versatile choice for controlling the entire home.

The 5" diagonal display presents beautiful color control graphics and full-motion video with a clarity previously not found in this size. A light sensor automatically brightens or dims the display with room light so it's easy to see any time of day or night. With an exceptional viewing angle, you'll enjoy an outstanding picture. Best of all, its exclusive Virtual Digital Pan and Zoom feature is as useful as it is fun to use. Thanks to Crestron's advanced digital video processor circuitry, just touch the screen with your finger to pan across the video picture and zoom in for the best view. You can watch video in a window at the same time you are using your control panel.

The TPS-2000L audio capabilities are just as impressive. WAV sound file storage and playback provide audio feedback, from sound effects to the sound of your own voice. A microphone, amplifier and speakers let you talk with arriving guests, as you view them on the screen. Adjustments are also available for volume and tone.

The TPS-2000L can be the central control point in any part of the house or use it in larger systems to complement other Isys panels.

Its compact size lets you mount it on the wall for whole house control or in a sofa or chair arm, for the ideal command center in your home theater. Inlays for paint, wallpaper, and designer metal finishes are available.

> *Isys technology in a versatile, compact size*

> *5" diagonal touch-sensitive LCD screen*

> *Ten (10) easy-to-use pushbuttons*

> *High quality control graphics and full-motion video*
